

## HSA-385/4+0 M S

- Surge arresters type T2+T3 ensure the equipotential bonding and reduce switching, induced and residual overvoltage in LV power supply systems.
- The products consist of varistors with big discharge ability.
- Configurations $1+1$ and $3+1$ are additionally combined with a gas discharge tube which ensures zero leakage current through the PE conductor.

- Installed at the boundaries of LPZ 1 - LPZ 3 into subsidiary switchboards and control panels.
- If the product contains two PE (or PEN) terminals, it must not be used as a PE (PEN) bridge.
- M indication specifies a type of construction with removable module.
- S indication specifies a version with remote monitoring.
